RESPONSE TO RESTRICTION REQUIREMENT WITH TRAVERSE

Dear Sir:

In the Office Action dated August 1, 2000, the Examiner refers to the following patentably distinct species of the claimed invention, namely:

Species I comprising Figs. 1-6;

Species II comprising Figs. 7-17;

Species III comprising Figs. 18-27; and

Species IV comprising Figs. 28-36.

Applicant, with traverse, conditionally elects Species I comprising Figs. 1-6. Claims readable on the elected species are numbers 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, and 18.

Applicant's traverse on the grounds that the embodiments of Figs. 7-36 are alternate versions of same invention, namely, an edge-released, double-pronged latch member with different mechanisms to prevent unintended release of the prongs unless a manual release member is actuated.

Figs. 7-17 relates to an alternative means, a sliding lock for, locking the male member's prongs from inadvertent release.

Figs. 18-27 illustrate another alternative means, a rotary lock, for locking the male member's prongs from inadvertent release.

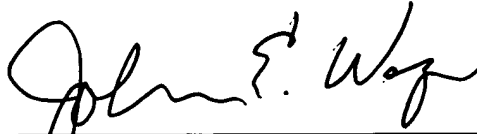

Finally, Figs. 28-36 disclose yet another alternative means, a button release on the female member, for locking the male member's prongs from inadvertent release.

Each of the inventions illustrated in Figs. 1-36 are related inventions.

It is submitted that allowance of any of the generic claims 1, 10, 14, 15, and 17 should allow all of these species to be considered allowed.

For the foregoing reasons, it is believed that the restriction requirement is improper and should be withdrawn and that an action on the merits of all claims be provided.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "John E. Wagner". The signature is fluid and cursive, with the first name "John" being the most prominent.
